Informed Consent for Chiropractic Care

Chiropractic care, like all forms of health care, while offering considerable benefits may also provide some level of risk. This level of risk is most often very minimal, yet in rare cases, injury has been associated with Chiropractic care. The types of complications that have been reported secondary to Chiropractic care include: sprain/strain injuries, irritation of a disc condition, and rarely, fractures. One of the rarest complications associated with Chiropractic care occurring at a rate between one instance per one million to one instance per two million cervical spine (neck) adjustments may be a vertebral injury that could lead to a stroke.

Prior to receiving Chiropractic care in the Chiropractic office, a health history and physical examination will be completed. These procedures are performed to assess your specific conditions, your overall health and in particular your spinal health. These procedures will assist us in determining if Chiropractic care is needed, or if any further examinations or studies are needed. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another health care provider. All relevant findings will be reported to you along with a care plan prior to beginning care.

- I understand and accept that there are risks associated with Chiropractic care and give consent to the examination that the Doctor deems necessary and the Chiropractic care, including spinal adjustments, as reported following my assessment.
- I agree that a photocopy of this form may be used in place of the original. All professional services rendered are charged to the practice member. It is customary to pay for services when rendered unless other arrangements have been made in advance. I understand that I am financially responsible for charges not covered by this assignment.
